

# CSS Layouts

**DEADLINE:** 05.10.2020

## FOLDER STRUCTURE

FL14_HW4/* <ul style="list-style-type: none"><li>└ task/<ul style="list-style-type: none"><li>└ FL14_HW4.docx</li><li>└ template.png</li></ul></li><li>└ homework/*<ul style="list-style-type: none"><li>└ css/*<ul style="list-style-type: none"><li>└ style.css*</li></ul></li><li>└ img/*<ul style="list-style-type: none"><li>└ footer-bg.jpeg*</li><li>└ footer-img.png*</li><li>└ header-bg.png*</li><li>└ section-1.jpeg*</li><li>└ section-2.jpeg*</li><li>└ section-3.jpeg*</li><li>└ space-bg.png*</li></ul></li></ul></li><li>└ index.html*</li></ul>	* – required
--	--------------

## TASK

You need to create a HTML page template according to provided design.

Use HTML5 **semantic** elements.

Minimum size of screen when web page shouldn't be "broken" is more and equal **900px**.

Header section should occupy all height of the browser window.

All required images can be found in **img** folder.

**NOTE:** Please, pay attention to hover state of footer e-mail link. It must be a live mailto link.

## Colors, used in design:

#FFFFFF, #808080, #111111 – text  
#0b013c - headings  
#0b013c - bg  
#f8cb8a, #f6bb66(:hover) – submit button  
#fefaf3 – content bg

## RESTRICTIONS

- Do not use any **javascript** or **css framework** for this homework.
- No requirements for browser support (should correct work in Google Chrome last version).
- All distances between block set by yourself (tips: you can use Pixelperfect browser addon but it isn't requirement)

## BEFORE SUBMIT

- Read requirements and compare to your homework result
- Format the code (remove unnecessary lines of code)
- Remove all unnecessary files that you might have included by mistake
- Validate HTML(<https://validator.w3.org/>) and CSS (<https://jigsaw.w3.org/css-validator/>)

## SUBMIT

- The folder should be uploaded to GitLab repository “**FL-14**” into **master** branch.
